Art Unit:

The amendment filed January 18, 2002 has been received and entered into the file.

Claims 43-58 are presented for examination.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-15 are rejected under 35 U.S.C. § 102(b) as being anticipated by Eisenberg.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Art Unit:

Claims 43-58 are rejected under 35 U.S.C. § 103 as being unpatentable over Pike et al and Eisenberg.

Pike et al and Eisenberg teach the claimed compounds as old and well known in combination with various pharmaceutical carriers and excipients in a dosage form. This medicament is taught as useful for treating various maladies. Claims 45-47, 49 and 55-57, and the primary references, differ as to:

- 1) the employment of these medicaments by conventional means and routes, and
- 2) administration of the medicaments for specific therapeutic goals.

Claims 45-47, 49 and 55-57 specifically require conventional pharmaceutical compositions and delivery routes. Pike et al and Eisenberg employed the claimed compound in a dermal form, subcutaneously, IM, trans dermal, and orally, not specifically reciting the exact formulation. The skilled artisan would have seen conventional compositions, and the administration of these compositions by conventional means as residing in the skilled artisan purview.

Applicant's attention is drawn to In re Dillon, 16 USPQ2d 1897 at 1900 (CAFC 1990). The court sitting in banc ruled that the recitation of a new utility for an old and well known composition does not render that composition new.

No claims are allowed.
